city.

A Solution in Rhyme.

To the Editor: The steward, if he knew his "big." Yould go right to the fair, And purchase sheep just twenty-dve, And stirks even pair; To make a level bid For eighty-five fine-looking lambs,

And I guess that's what he did. ARTHUR G. MASTERS.

For the First Time. To the Editor: In answer to James Cooper's problem for en cincers, which appeared in "The Evening World" f March 24, and which reads as follows: "A cirlying on its side, contains a foot of water. How many gallons are there in it?' If the boiler is to soak for a few minutes in the mix exactly 3 feet diameter on the inner surface and ture. Then put each slice between two s 40 feet long and is lying on a level surface. and the water in it is 12 inches in depth, no more lone, and as this is the first time in the history of the world that this problem has been correctly solved it is but right that your enterprising journal should be the first of the great American newspapers to make the fact known to its readers ED D. O. MOORE, Bay Ridge, L. I.

Island 20 miles in circumference. The man who mile per hour, and gains on him 10 1-3 miles per hour; hence the two will be together in 20-10 1-3, equals 60-31 hours. The time in which enters his soul, and his nature must be a grand all three will be together will be expressed by one to withstand contamination. When times are the least common multiple of 60-7 bours and 60-31 dull capital can stop and withold its nervices till hours, which equals 60 hours.

J. D., hours, which equals 60 hours. J. D., Highland Falls, N. Y.

The Water in the Boiler.

To the Editor: To solve the problem one must find the area of the segment of a circle, radius being 4 feet pay 25 cents for twenty-two. This is the and height of segment being 1 foot. The angle sign in the grocers' windows on the of the corresponding aector is \$2 degrees 49 min-stes. The area of sector is 11.528 square feet. The area of triangle formed by the two radii and the segment's chord is 7.937 square feet. Consequently the area of segment is 3.591 square feet. This area, multiplied by 4st, multiplied by 1,725 and product divided by 231 equals 1.074%, the rumber of gallons contained. A trigonometr 2 South Oxford street, Brooklyn.

Mme. Pattl's Charity Concert.

New Spring Cont.

Here is a model coat for Spring wear. It is made of black serge, smartly cut, semi-fitting in the front, tight at the

oack, with admirably setting moir sleeves, lined with silk, and completed until it is quite stiff and serve it as a with a moire bow at the neck.

Cheese Fritters.

Slice thin half a dozen large, tart apples and prepare half as many thin slices of cheese. Beat up one or two eggs, according to the quantity required, and season high with salt, mustard and a little pepper. Lay the slices of cheese ture. Then put each slice between two slices of apples, sandwich style, and dip the whole in the beaten egg. Fry in hot butter and serve hot.

Mephisto Capes.

The Mephisto cape is for afternoon and vening wear. It consists of two flaring, bias black moire antique "1830" shoulder capes, from under which a deeper one for the hips is suspended, giving the effect of a coat, without its weight. The cachet of the garment lies in the neck trimming, the Mephistophelean horns of moire protruding from each side of the crushed collar directly under the ears producing the broad effect so much desired this Spring. The same idea is car ried out at the waist, where a loosely folded belt is set off with another and larger set of horns. A jabot of cream lace at the throat gives a touch of brightness to this stylish wrap, which is

as serviceable as it is effective. Eggs Flush--Prices High.

Notwithstanding the great supply of fresh eggs, the consumer is obliged to east and west sides of town. Springtime Pleasures. Get ready for the Spring cleaning! Tidy up the lawn and garden; place your Wire hairpins were invented in Engorders for seeds and plants; hunt up "de

shovel an' de hoe;" see that the garden conflures were held in place by fine hose is not burst in too many places; bring out your window shades and screens; see that all the trellis work is in good order; have the flower vases examined and cleaned; keep the servant put them in a stewpan and make a rich a the Editor:

have been just as unnecessarily so.

Popular Stripes. Tall girls have the call, and striped with a shirtwaist, open or closed. These t the papers Friday, one-stath Saturday, two- being all in one color. The stripe is inches wide.

Brenkfast Omelet.

Beat together four eggs until they are light, and include a heaping saltspoonful of sait, half a saitspoonful of pepper, and four tablespoonfuls of cream or mill preferably the former. If preferred, the salt may be sprinkled on top omelet while cooking. Have ready in an omelet pan a teaspoonful of hot butter that is just beginning to smoke, and turn in the eggs. Pull up the edges of the omelet as they stiffen, to allow the still liquid pertion to reach the hot pan; when this is mostly cooked allow the under side to brown slightly, double one-half evenly over upon the other, and serve at once on a napkin laid upon a heater platter, turning the corners of the napkin over the omelet as it goes to table. uld the use of the napkin seem objectionable, drop a few sprigs of cress half cotton. or parsley on the top and edges of the 60 cents to \$2; outfitters make them to omelet. If the eggs are fresh and are order for \$3, and dressmakers charge properly beaten this omelet is sure to be light and excellent.

Ironing Collars and Cuffs.

Don't dip collars or cuffs or shirt fronts in boiled starch. You will be sure to come across lumps when ironing. Rub the starch on the articles on the wrong side with the fingers, and as topics of conversation everybody has to soon as it begins to appear on the right give a quotation. The emotional maiden side it is sufficiently starched.

Racabout des Arabes.

contented with ft.

One tablespoonful of racahout, one tablespoonful of salt, one cup of hot water, one cup of milk. Put the racahout and salt into a saucepan. Mix with a little cold water, pour on the boiling hot water and simmer for ten minutes; then pour in the cup of milk, let it again reach the boiling point, strain and serve very hot. Racahout is a compound of sugar, arrow root, rice flour and French chocolate. It makes a most appetizing and nutritious gruel.

Quick Change of Coiffure. From 1784 to 1786 the style of hairfressing in Paris changed seventeen

times, and went from the extreme of short curls and a skull cap to a hat three feet broad.

Snow Pudding.

Prepare about two cupfuls of preserved fruits-for instance, pineapple, peaches, greengages and cherries; keep the cherries whole, but cut the others in dice; moisten them all with sherry. Prepare about a quart of jelly made of sherry or pale brandy, and when strained pour into a basin, which place upon ice; whip it now gently with the egg-whisk, adding the juice of lemons; when it begins to set and is quite frothy (not too much so, however) stir in the fruits; place all in a mould and suround with ice. Flavor and sweeten a pint of cream and whip it sauce. If you choose, a custard may be used instead; many prefer it; in that case simply make aboiled custard with a pint of milk and four eggs, sweeten to taste, add a pint of salt and cook in a farina kettle until smooth and of the proper consistency. Stir until cool and serve with the jelly.

The Between-Seasons Hat.

The between-seasons hat is now in evidence. Jet appears to be its foundation, Many of the bonnets seen are merely tiaras of jet with a bow or twist of bright velvet in the front. A bonnet of this description is really an economical investment, being capable of many changes. The very latest jet fancy is a tlara of fine jet butterflies with delicate wings of black gause sprinkles with jet In front is a butterfly of gay velvet, its edges outlined with uncut jet. Or black feathery algrette sprayed with jet

is used, combined with loops of velvet. Old-Time Fashions.

Greek ladies had steel and brass mirrors, parasols, fans and smelling bottles. Lay figures for fitting on ladies' dresses were invented in France about 1390, Corsets have been found on the mummies of Egyptian princesses of the royal

family. In 1516. Francis I, gave to his Queen the equivalent of \$16,000 in our money to buy a hat.

The women of the middle ages always parted their hair with a small dagger. When not in use it was carried in the girdle. Philippe le Bel, of France, ordered

that no tradesman's wife should wear a gown made of stuff costing more than 20 cents a vard. land in 1545. Before that time the female
